

# IBM INDIA RESEARCH LABORATORY

## Summer Internship Program 2009

IBM India Research Lab is pleased to announce the 2009 Summer Internship Program in Computer Science, Mathematical Science and Services Science & Management Engineering at its locations in New Delhi and Bangalore. We are seeking highly motivated graduate and undergraduate students, who are interested in experiencing an exciting summer of research. The selected students will have the opportunity to work closely with an outstanding research team on challenging problems that range from leading-edge exploratory work to prototyping real-world systems and applications. During the summer internship, the students will also have the opportunity to participate in the dynamic technical environment of the largest Industrial research organization in the world and network with other top students from many different fields and universities.

### **2009 program is scheduled between May - Aug**

To apply for a summer internship position, please visit: [www.research.ibm.com/irl/si\\_studentsprog.html](http://www.research.ibm.com/irl/si_studentsprog.html)

#### **IRL offers projects in various research areas such as:**

- *IT Infrastructure Management*
- *Information Management*
- *Knowledge Discovery and Data Mining*
- *High Performance Computing*
- *Programming Technologies & Software Engineering*
- *Telecommunications Research*
- *Analytics & Optimization*

The IBM India Research Lab (IRL) was established in April 1998 in New Delhi as the eighth of IBM's research labs. The lab expanded to its second site, Bangalore, in August 2005. IRL has a world-class team of researchers who have been recognized for their thought leadership and have developed innovations that help differentiate IBM both in the region and globally.

As the best and largest IT Research & Development Lab globally, IBM produces more breakthroughs than any other company in the industry. It has earned more patents than any company for 14 years running. Big Blue's more than 3200 scientists spread across eight world-renowned research labs work in close collaboration. IBM invests over \$6.1 billion annually in technology R&D.
